LinkedIn | (+92) 3708218757 | khalidkhankakar2468.com | GitHub

Skills

- **Languages**: JavaScript | TypeScript | HTML/CSS |
- **Frameworks**: ReactJS | NextJS | MongoDB | Node | Express | React | GSAP | Redux Toolkit | Drizzle ORM Tailwind CSS | Auth.js | Clerk
- **Tools:** Vercel | Git/GitHub
- **Skills/Proficiencies:** Frontend | Backend | Full-Stack | English, Urdu, Pashto – *All professional proficiency or above*

Experience

MERN Developer	TechnoKloud	*Faisalabad, Pakistan*	**02/2024 - 07/2024**

- Collaborated with cross-functional teams to de liver high-performance web solutions.
- Improved page load times by 20% through optimization strategies.
- Developed scalable web applications using **React.js**, **Next.js** and **Drizzle ORM**.
- Designed and developed user-friendly websites, optimizing them using tools like **Chrome DevTools**.

ReactJs Developer (Inter)	TechnoKloud	*Faisalabad, Pakistan*	**08/2023 - 02/2024**

- Built reusable components and integrated **API**s using **React.js**.
- Worked on form validation and state management in dynamic pages.
- Resolved **bugs** on existing websites and implemented enhancements to improve overall functionality.

Junior Frontend Developer (Inter)	Pearl Academy	*Quetta, Pakistan*	**03/2022 - 07/2022**

- Analyzed dependencies using **Webpack Analyzer** to optimize performance.
- Organized code files and folder structure for improved clarity and maintainability.
- Practiced **HTML**, **CSS**, and **JavaScript** tasks to strengthen skills and enhance proficiency.

Education

BS Data Science	Govt. College University	*Faisalabad, Pakistan*	**08/2022 - Present**

- Major in **Computer Science** and **Statistics**

Projects

- **STACK OVERFLOW (CLONE):** I developed a Stack Overflow Clone with most of the features found on the original website. I built this application using **NextJS**, **ReactJS**, **TypeScript**, **MongoDB** and the **OPEN AI API**, with **Clerk** authentication. Additionally, I integrated the OPEN AI API and deployed on **Vercel**. **Live Link**:- https://codeoverflow-eta.vercel.app/ **GitHub Repo:-** https://github.com/khalidkhankakar/codeoverflow

- **DEV POST:-** Built a complete platform for creating, posting, and managing articles with full CRUD operations, advanced search and filtering, and secure authentication. I built this application using **NextJS**, **ReactJS**, **TypeScript**, **MongoDB** and **Clerk**. **Live Link**:- https://devpost-gold.vercel.app/ **GitHub Repo:-** https://github.com/khalidkhankakar/devpost

- **BOOK SHELF:-** I built a Bookshelf web application where authors can upload books, and users can access a global collection. The platform offers both free and paid books, with **Stripe** integrated for payment processing. Users can save books, add them to favorites, mark them as 'to read,' use a dedicated reading mode. Advanced search and filtering are included, and authentication is powered by **Auth.js** with social login options via **Google** and **GitHub**. The app is developed using **Next.js 14**, **React.js**, **Tailwind CSS**, **PostgreSQL**, and **Drizzle ORM.** **GitHub Repo:-** https://github.com/khalidkhankakar/bookshelf
